

**PRE-PURCHASE EXAM INFORMATION**  
COLLEGE STATION, TEXAS  
(979) 229-7845  
**Ryan M. Lee, MS, DVM**

**Buyer Information:**

**Initial Exam: \$150.00 (Travel expenses are not included)**

Encompassing a complete standing (musculoskeletal, brief neuro/dental exam) & ambulatory (moving) exam. MS exam: looking for obvious defects/scars/swellings, joint abnormalities (ie: "clicks," decreased range of motion, excess fluid accumulation, etc), abnormal boney enlargements, or apparent surgical scars. The standing exam ends with a hoof tester evaluation. Part 2 is the ambulatory exam: ideally initiated on hard surface, with flexion tests performed on all four limbs. The remainder of the exam includes a neurological exam to rule out any possible neurological deficits, an oral exam to observe the health of the tongue and mouth and decide if the horse needs dental work, an ophthalmic exam that focuses on the cornea/lens/fundus of both eyes, including checking for early signs of cataracts or retinal detachment. It is my duty to discuss any abnormalities found & the implications of these abnormalities as it pertains to the intended future use of the horse. **IT IS NOT MY DUTY TO "PASS OR FAIL" A HORSE: I will present findings & if the buyer perceives a lameness or finding that makes them uncomfortable enough not to proceed with purchase, at that point buyer can halt the exam.**

**Optional costs for buyer:**

These are complimentary to the above initial assessment, and are offered to further investigate any abnormalities found in the standing or moving exam. Otherwise, these items allow further investigation for problems that might lead to disease or ward off potential buyers for this horse in the event of a future resale (eg. Navicular bone abnormalities, kissing spines, etc). Please read through these additional services below and select the services which you would like performed at the time of your pre-purchase evaluation. **This is an exciting time, we hope that we are looking at your newest addition to your remuda. We look forward to serving you!**

**Radiographs/Ultrasonography (Digital) \$280 - \$1350**

Depending on the findings in the initial exam, x-rays or tendon ultrasound might be recommended. If this is a horse currently in work, we recommend that the buyer, at minimum, take x-rays of the front feet to evaluate the navicular bones (\$180-\$240). It is also a suggestion (depending on breed & use) that we take X-rays of the back to look for impingement in the dorsal spinous processes (aka "kissing spines" – these two items may impact future resale of the prospect & therefore should be considered at time of purchase. Otherwise, we will make suggestions depending on intended and current use or findings during the moving exam. A respository "full" set of pre-purchase radiographs requires up to 34 views (includes a navicular series of the front feet, all four fetlocks, both hocks, and both stifles). Please keep in mind that we might need to remove shoes from this horse in order to obtain the best quality radiographs of the feet. It is your responsibility to make arrangements with the horse's farrier to have the shoes replaced. If you have concerns about this, please discuss them with the veterinarian performing the exam before the date of the appointment.

**Breeding Soundness Exam (\$150 - \$265)**

Mares only: an ultrasound of reproductive tract (sedation might be required), sterile preps & cultures, a visual appraisal of reproductive organs (vaginal vault, cervix, & vulvar confirmation.)

**Pre-Purchase Drug Screen \$300 (Recommended)**

The horse's serum is tested for over 30 different drugs, such as non-steroidal anti-inflammatory drugs, muscle relaxers and sedatives. This blood work is sent to an outside toxicology laboratory, and the results can take up to 7 days to become available.

**Blood Drawn and held for 1 year: \$55**  
(for drug screen at a later date)

**Chemistry Panel & CBC/CYTOLOGY \$95**

These blood tests can provide helpful information regarding other internal organs (liver & kidney function) that cannot be discerned from an outward exam.

**Coggins \$31.50 - \$75**

We can submit a Coggins for regular turn-around time, or we can submit an ELISA if you need it within 24 to 48 hours. Please let us know the date you will need the Coggins.

**Health Certificate Exam \$38 (additional blood tests may be required for Export)**

Required to accompany a current, negative Coggins for horse traveling out of state. Please provide name, address, and phone number for the destination to which the horse will be traveling. Also, provide the hauler's information.

**Insurance Exam/Form \$45**

If required by your insurance company. Please supply the insurance form (if applicable).

**Endoscopy \$85-\$115 (if sedation required)**

This procedure allows for us to visualize the upper respiratory tract. It can be helpful in the diagnosis of upper respiratory infection and respiratory diseases.

**Information - Buyer:**
